

Soldi 460

- High-level security and fast
- For business environments with cash transactions
- Optional with update function

Soldi 460

Automatic Banknote Detector

Stop counterfeits with state of the art testing technology. According to ECB test results, the Soldi 460 offers the highest possible level of security. All Euro banknotes may be inserted in any direction. The direction of the banknote ejection is variable; banknotes may be ejected from the front or rear of the device to suit all locations and requirements. The device warns you both acoustically and optically of counterfeit notes. The Soldi 460 addi-

tionally counts the quantity and denomination of banknotes tested. Depending on the equipment the Soldi 460 is fitted with an update function. You can easily update the Soldi 460 with your PC. New software can be sent to you by Email.

The automatic banknote detector is available in the following 3 different versions:

1. Soldi 460 basic model
2. Soldi 460 with update function
3. Soldi 460 with update function and rechargeable battery.
