TECHNICAL CHARACTERISTICS - CARACTERISTIQUES TECHNIQUES - CARATTERISTICHE TECNICHE

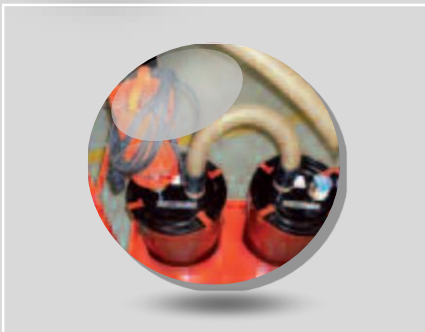

Standard potable dust collector

- Structure with black Epoxy coating.
- System of suction ring / nut connected on the structure.
- Fan motor with the following characteristics:
 - Air flow : 216 m³ / h – 127 Cfm
 - Depression: 26000 Pa
 - Power supply: 230 V single
 - Power: 1200 W
 - Fuse included
 - A M / A switch
- 5 meters – 196 Inch power cable 3 brown
- Weight = 4 Kg / 8,8 lbs

Discharge

- Steel box filter decanters
 - 10/25/50 liters capacity
 - Fibreglass filter paper
- Efficiency of filtration H 13 (1822)
 - High capacity retention
 - Mobile
- Resistance to nuclear radiation
 - Standard ASME-AG1
 - Standard NFX 44-011
- Temperature of use : 80°C / Fire protection standard: M1
- Weight = 2,9 Kg / 6,4 lbs

Accessories - Options

- Rotary vane / Suction pipe
- Version with more containers or filters connected in series
- Following accessories suction needed.
